Hi Sam, just wanted to be sure you caught this. Cathy was terrific this morning in quickly making the photo carousel on Gold King Mine home page responsive.

Great work, and fast. Thanks.

Ok, I changed the slideshow div to 85% width and that seems to have done it on my phone.

Hi, please try making the photos (or the photo div?) a smidge smaller, so the nav arrows stay on the sides.

thanks.

It's all about percentages if you want it to be responsive. I was able to make it a little bigger though so reload the revision - <https://wcms.epa.gov/node/104989/revisions/221469/view> - and see if that's better.

Hi, well, it works at narrow screen width. Thanks!

But I see the photos are scaled down a bit ... can the photos be scaled to **600px wide**?

I had coded it with width:600px and left off the height so it would set itself.

Sure, take a look at this revision - <https://wcms.epa.gov/node/104989/revisions/221469/view>

Can you look at revisions on your iphone? There's some space with the arrows and the extra space below the slideshow but at least it fits better.

Another issue we need to think about is those arrows are still in epahome and we probably need to figure out how to get into drupal.

Hi - please see the photo carousel on page <http://www2.epa.gov/goldkingmine>

This carousel should look familiar! I created it using the code from page

<http://www2.epa.gov/aboutepa/day-life-epa-administrator-8>

Any thing you can do to make the photo carousel Responsive?

ATTACHED is a mockup of approx. what it looks like on my iPhone. (I can't take an iPhone screen shot, since OEI disabled screen shots on EPA iPhones :-(
